

Supporting Ramsgrange Community School

A brief history of computers in secondary schools:

1985 - 2008 Focus on computer skills

1985

Junior Cert change begins
- computers mentioned
in some subjects

1999

Leaving Cert Vocational
Programme - ICT part
of subjects

2008

ICT Framework for Schools
launched - computers to be
integrated across subjects

Basic Skills

1994

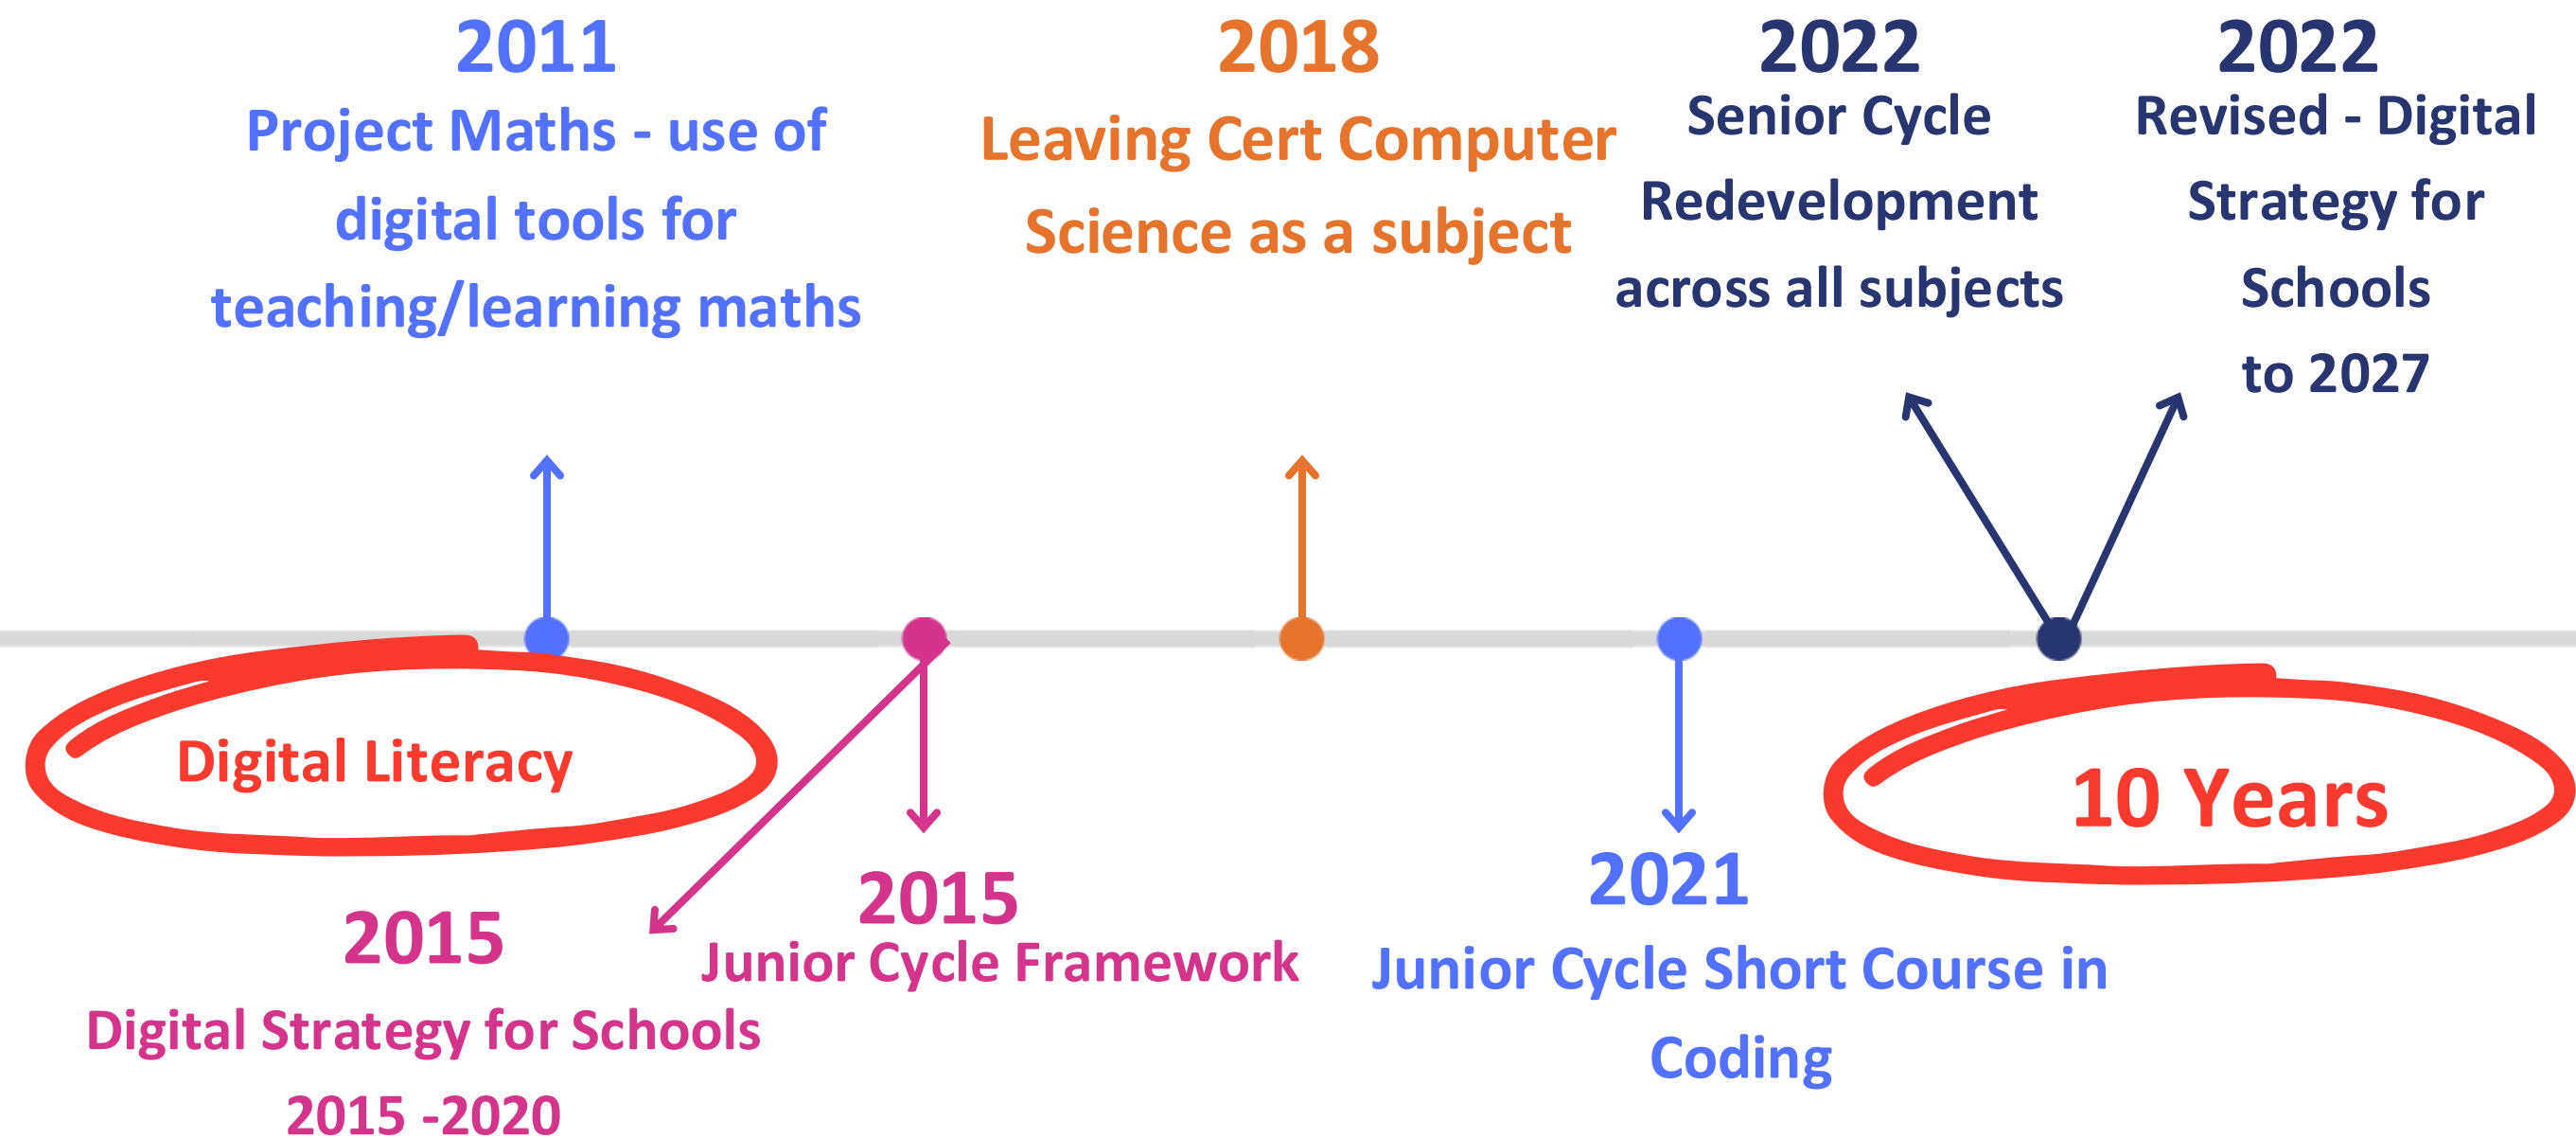

Leaving Cert Applied -
basic computer skills
included

2000

Leaving Cert revised
ICT part of
business/technology
subjects

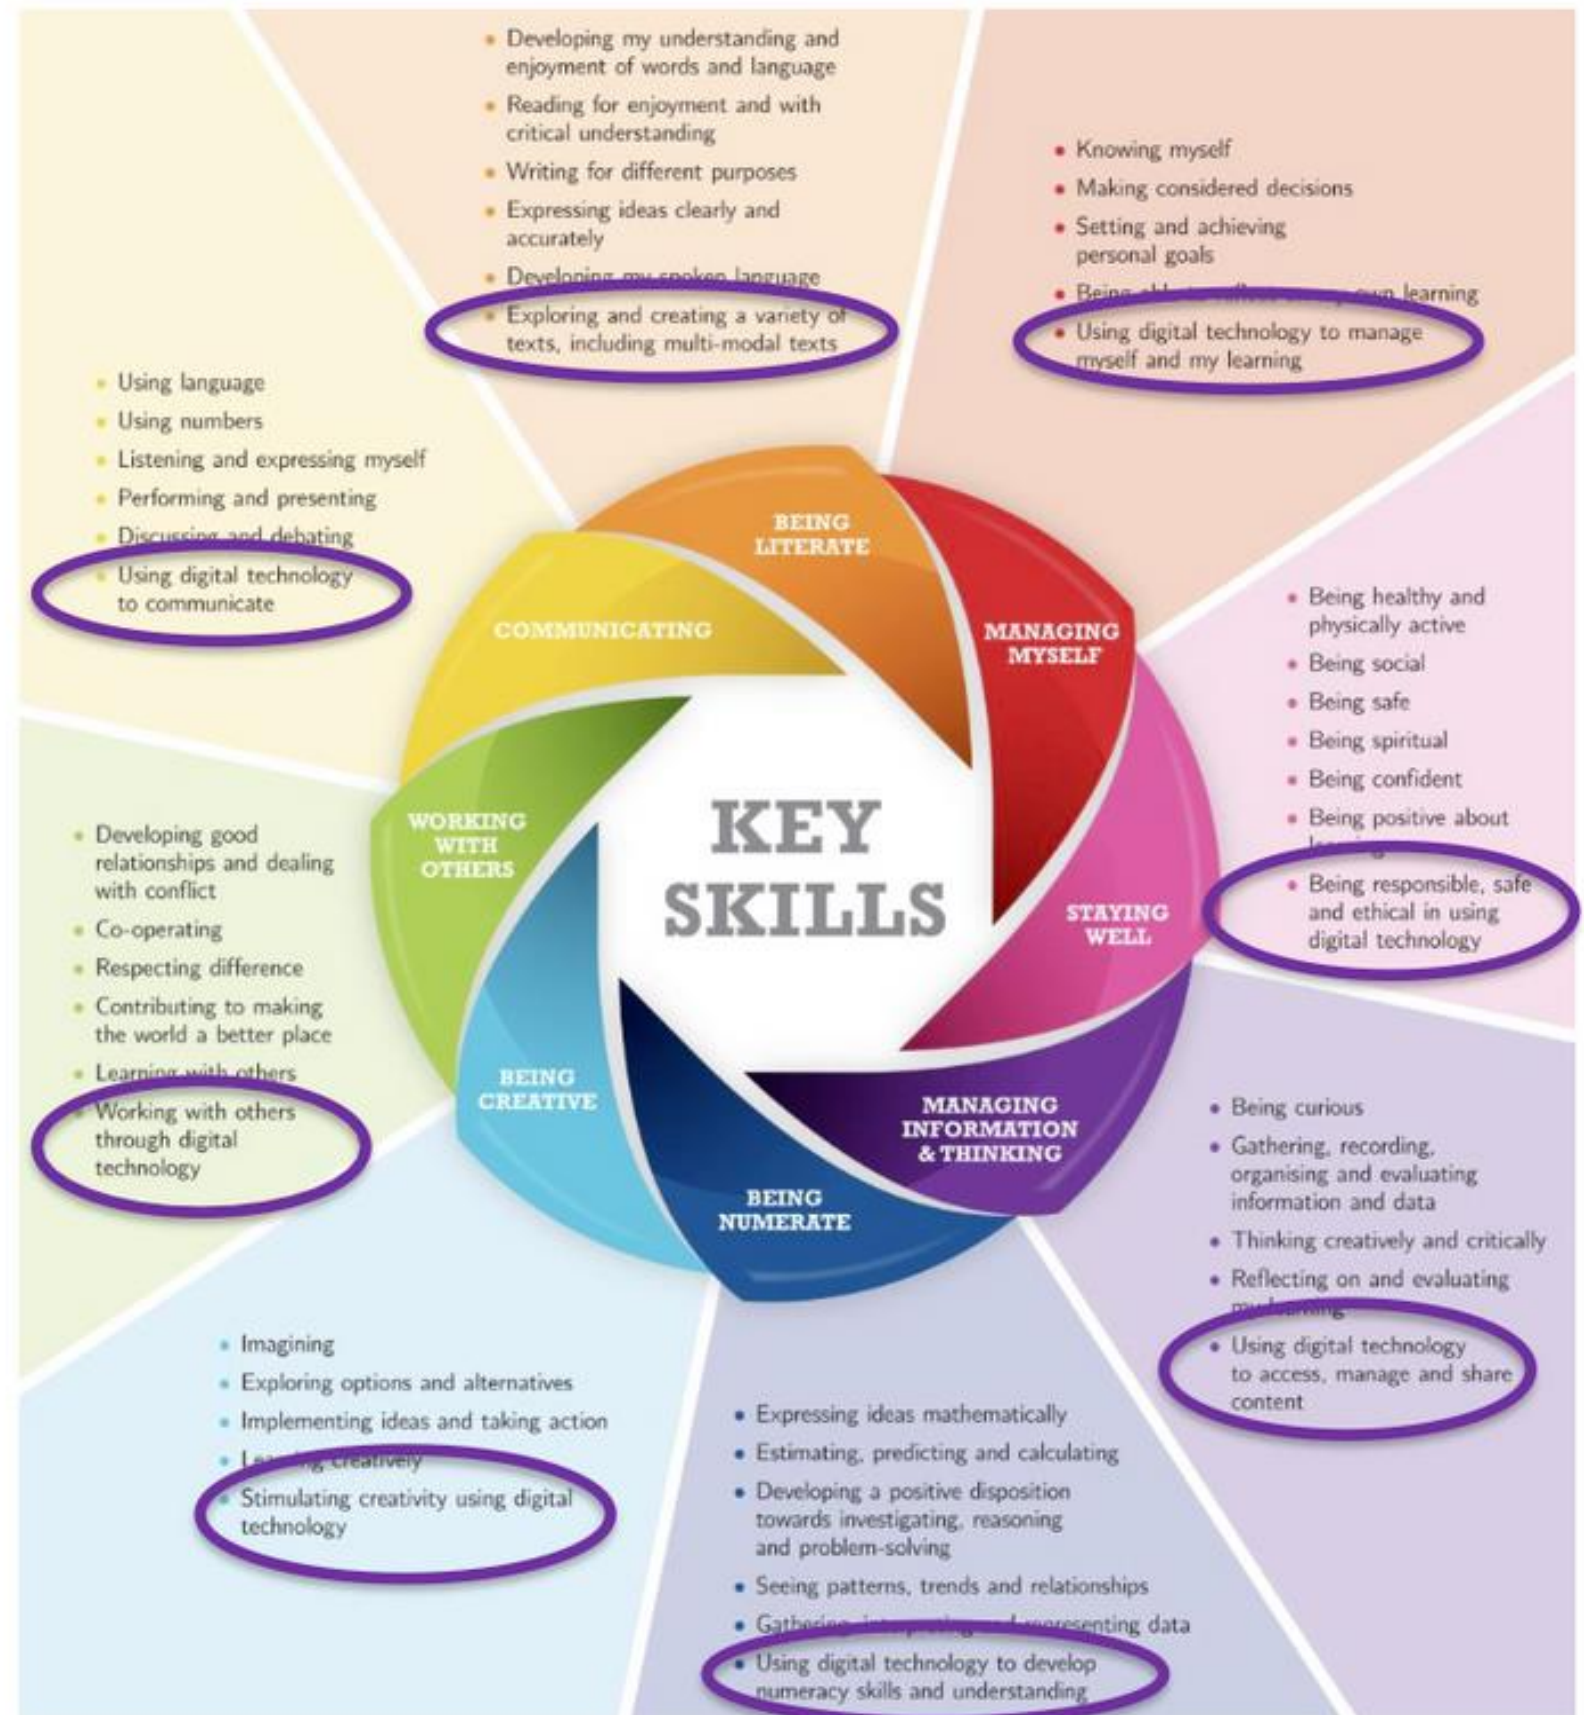

23 Years

A brief history of computers in secondary schools: 2011 - focus on Digital Literacy

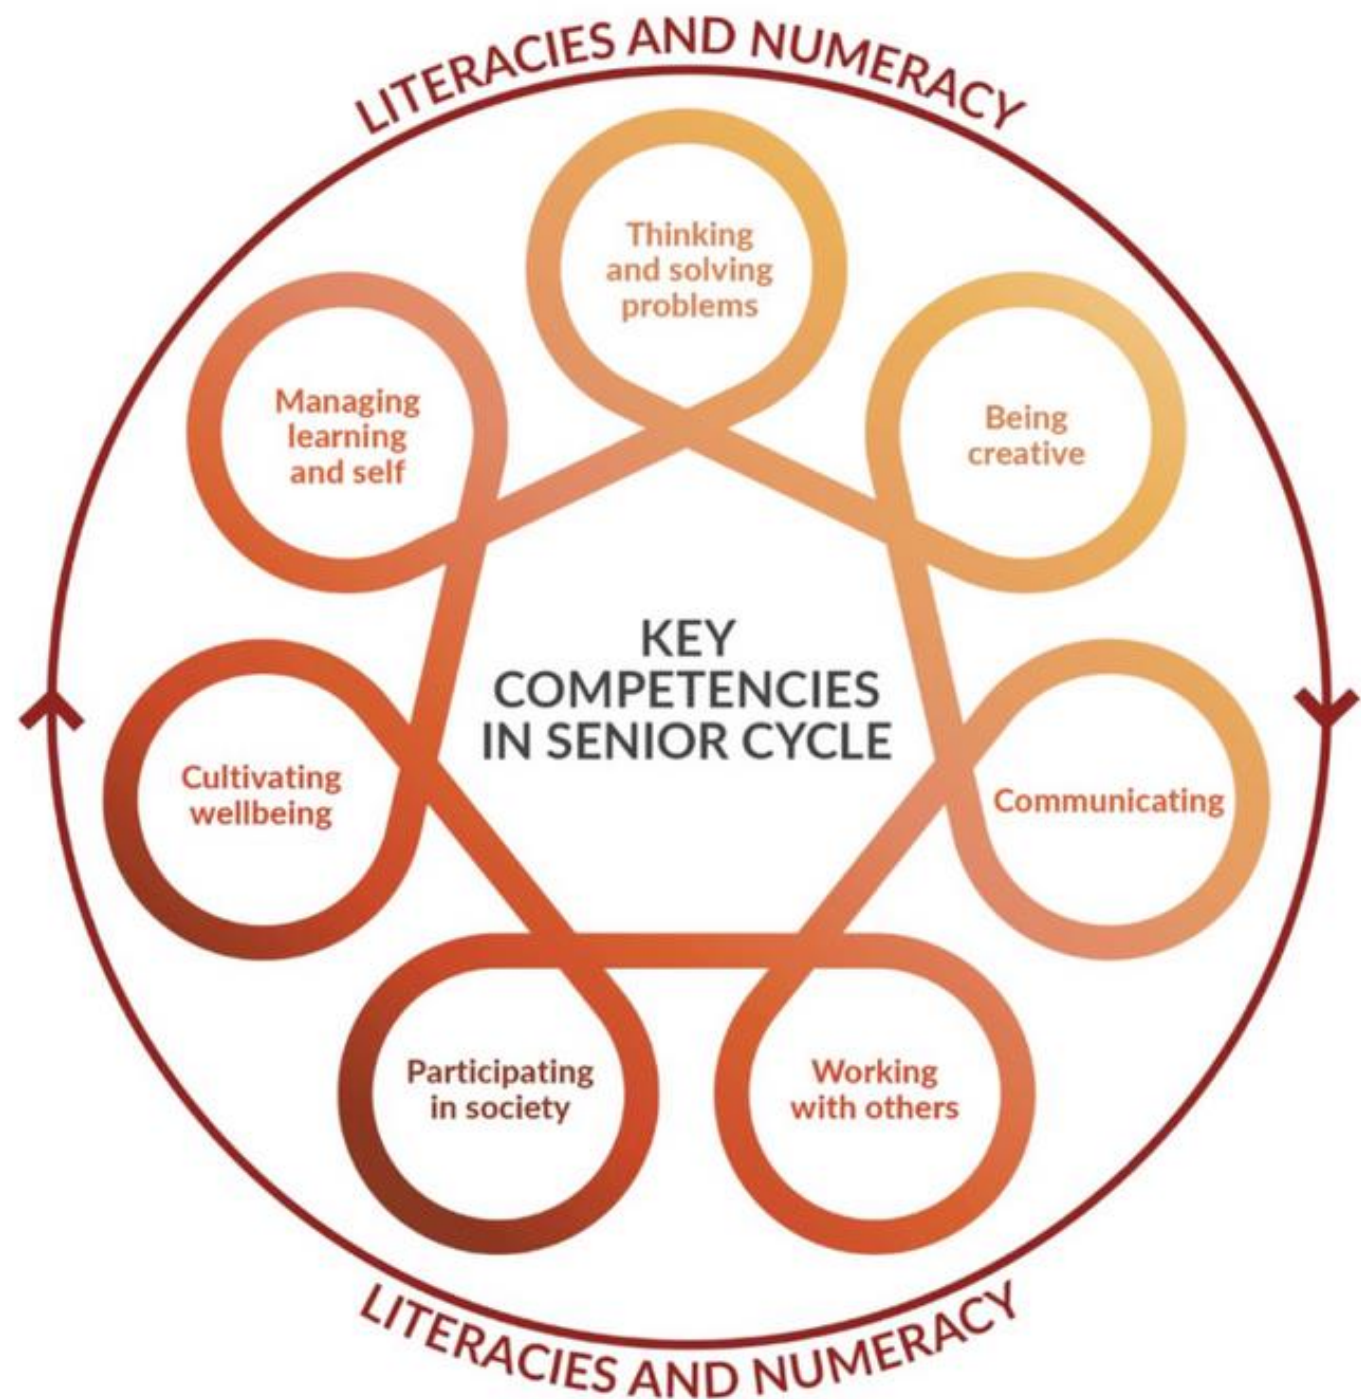

Since 2015 - CBAs

Framework
for Junior
Cycle –
**digital is
within**
every key
skill!

Starting 2025 - AACs Additional Assessment Components 40%

Senior Cycle
Key
Competencies –
technology
as a tool to
support
learning

- students' literacies are well developed, i.e., when they can meaningfully and effectively read, watch, write, speak, listen, and mediate meaning.
- students' numeracy is well developed, i.e., when they can understand numbers, data and symbols meaningfully and interpret and use them effectively.
- students make good use of various tools, including technologies, to support their learning.

	Computer Skills	Digital Literacy Skills
Definition	Basic abilities to use computers and software applications effectively.	The ability to find, evaluate, utilize, share, and create content using information technologies and the internet.
Focus	Practical use of software and hardware.	Understanding and using digital tools and platforms responsibly and effectively.
Examples	Using word processors, spreadsheets, email, internet browsing, and basic troubleshooting.	Evaluating online information, understanding digital footprints, using social media responsibly, and protecting personal data.
Learning Objectives	To become proficient in using common software tools and performing everyday tasks on a computer.	To develop critical thinking, ethical understanding, and effective communication in digital environments.
Skills Developed	Typing, using office software, managing files, internet navigation, and basic digital literacy.	Information evaluation, online communication, digital content creation, cybersecurity awareness, and ethical use of technology.
Applications	Everyday tasks, office work, communication, and basic digital literacy.	Research, online collaboration, digital citizenship, content creation, and personal data management.
Educational Level	Often taught at primary and secondary education levels as part of digital literacy.	Integrated across various educational levels and subjects to promote responsible and effective use of digital technologies.

Why introduce 1:1 devices?

✓ **Critical ICT Competencies for the Modern Era:**

Mastery of Information and Communication Technology (ICT) is vital in today's digital landscape, ensuring that students are well-equipped for the challenges of both higher education and the professional world.

✓ **Facilitation of Research-Intensive Classroom-Based Assessments (CBAs):**

CBAs necessitate extensive research, and having access to devices allows students to efficiently utilise reliable online resources, rather than depending on less effective alternatives like mobile phones.

✓ **Conformity with the Revised Leaving Certificate Structure:**

With 40% of the Leaving Certificate now comprising project-based Additional Assessment Components (AAC), devices will be indispensable for organising, executing, and submitting these projects in a systematic and professional manner.

Why introduce 1:1 devices?

✓ **Minimizing Reliance on Physical Textbooks:**

Digital books reduce the daily burden on students while still allowing access to physical copies at home, fostering a more adaptable learning environment and supporting a blended learning approach.

✓ **Overcoming the Constraints of Mobile Phones:**

Mobile phones are inadequate for detailed academic work. Devices such as laptops or tablets offer the necessary screen size, tools, and functionality for effective learning.

✓ **Sustaining Our Current ICT Infrastructure Is Not Possible:**

Our ICT infrastructure has grown significantly since the Covid-19 pandemic, but this expansion is not sustainable without further support.

✓ **Ensuring Educational Resilience:**

The growing dependence on technology in education and society highlights the need for schools to adapt. Transitioning to a 1:1 model ensures that students and teachers remain competitive in an ever-evolving world.

A 2-in-1 Laptop made for students

Multiple Ways to Use

- Like a Laptop
- or like a Tablet
- or a mix of Both
- or anywhere In-Between

Great Specifications

- 128GB of Storage & 8GB of RAM
- Battery Life of 10 Hours
- Touch Screen
- Full Size Spinning Keyboard
- Digital Pen / Stylus
- Windows 11
- Build to withstand Hard Knocks

5 Year Extended Warranty

5 Year Accidental Damage Cover

Can I bring my own Computer / Laptop / Tablet / Phone / 2-in-1?

Everything that you need in One Bundle

Safe & Secure Set Up

- Each 2-in-1 Laptop is set up to be used safely and securely as a learning 2-in-1 Laptop
- Only Apps approved by the school for learning, will be available
- That means it is locked down for learning, with no distracting or inappropriate games

or social media

Ongoing Support for You

- Parents, Students and Teachers, receive ongoing support for any issues that might come up
- Full 5 Year Comprehensive Manufacturers Warranty
- Full 5 Year Comprehensive Accidental Damage Cover
- Lives on with Manufacturer for the full 5 Years

Bundle Total

€684

2-in-1

Laptop

Set Up & Security
